

ADDICRETE T

DESCRIPTION

ADDICRETE T is a safe additive designed to control the release of salts from concrete products, greatly increasing their market appeal and durability. ADDICRETE T reacts with soluble salts in the cement-aggregate matrix and prevents them from migrating as soluble salts to the surfaces of finished products. ADDICRETE T also acts as a cement and colour dispersion agent in the concrete wet mix as well as a water reducer.

APPLICATIONS

ADDICRETE T is used as an additive in the manufacture of cement masonry products such as concrete pavers, bricks and blocks. ADDICRETE T can also be used as an additive for renders, floats and premix concrete for slabs etc.

BENEFITS

- No unsightly chalking on finished products.
- Improved aesthetics, brighter, even colours.
- Improved structural integrity of products, better strength and abrasion resistance.
- One product for colour and cement dispersion and efflorescence control. No secondary additives needed.
- Minimal cost per mix.
- Has the ability to reduce cement in mixes whilst increasing strength and abrasion of finished products.

PRODUCT USAGE

WET MIX PAVING

As a guide, 350 - 700 grams of ADDICRETE T is added per 100kg of cement. Depending on water/cement ratios and cement-aggregate ratios, the ADDICRETE T quantity can be increased or decreased depending on the amount of lubricity required.

DRY MIX PAVING

As a guide, 350 - 700 grams of ADDICRETE T is added per 100kg of cement. Depending on water-cement ratios and cement-aggregate ratios, the ADDICRETE T quantity can be increased or decreased depending on the amount of lubricity required.

SAND FINISH RENDER

As a guide, 20-30 grams of ADDICRETE T is added per 20kg bag cement based on a 1:4 cement/sand render. Half the normal water should be added to the mix prior to adding ADDICRETE T. Let mix, then add water to achieve the desired slump.

SAND/CEMENT FLOATS

As a guide, 20-30 grams of ADDICRETE T is added per 20kg of cement based on a 1:5-6 cement/sand render. Half the normal water should be added to the mix prior to adding ADDICRETE T. Let mix, then add water to achieve the desired slump.

STORAGE

Store ADDICRETE T in sealed containers under cover in a cool area away from foodstuffs.

CLEAN UP

Clean up ADDICRETE T with absorbent material and dispose of according to state and federal laws.

PACK SIZES

ADDICRETE T is sold in packs of 18kg, 180kg and 900kg.
