

MARVELCLENE

DESCRIPTION

MARVELCLENE is acidic and care of use is required. MARVELCLENE removes rust from iron and steel as well as iron bore stains. Red iron stains on acid burnt bricks are removed as is Manganese stains on clay brickwork. Light calcium carbonate stains on glass or cutlery are removed.

DIRECTIONS

IRON AND CALCIUM STAINS: Remove with MARVELCLENE diluted between 2 to 5 times. Work up a dry wall.

METAL: Only soak steel objects in MARVELCLENE as supplied or diluted with water up to 3 times. Do not soak aluminium, copper, or other amphoteric metals. The amount of dilution depends on the degree of rust to be removed and its age.

GLASS: Apply dilutions between 5 to 9 times with water soaked on a rag. Wipe over the window face to remove stains from reticulation or material build up. Wash down with water. Stubborn stains can be removed with undiluted MARVELCLENE by spotting the stain and rubbing it with a rag.

TOILET BOWLS: Pour 100-200mL of MARVELCLENE into the water in the bowl. Brush the MARVELCLENE over the bowl and leave for 1-2 hours for light staining. For heavy staining, brush MARVELCLENE around the bowl 3 or 4 times at 2 hour intervals and leave overnight. Rinse after treatment with two flushes. Add 100-200 grams of sodium bicarbonate or sodium carbonate to bowl water and flush the toilet.

MANGANESE STAINS on clay brickwork: Dilute MARVELCLENE in the region as 10% by volume with water. Apply the diluted solution as a thin brush coat over the affected areas. Remove with a 3000 psi high pressure water spray.

CAUTION

Protect all metal, concrete and surrounding timber surfaces before use. A light white scum may appear over the face brick work after the treatment. This is due to calcium compounds on the face brickwork as a very light concentration. The brickwork must be cleaned of calcium compounds before treatment to remove manganese with MARVELCLENE.

NOTE

Before using the MARVELCLENE components as a mixture, diluted or straight, do a small trial on the stains or mortar to be removed so the optimum amount of MARVELCLENE is used and to observe the nature of the cleaning effect

NEUTRALISATION

After use neutralise with NEUTRA RTU as supplied or NEUTRA diluted 1 part NEUTRA C with 9 parts waters.

SAFETY

Wear rubber gloves, eye goggles, overalls and safety boots. Wear a face mask with absorbent cartridges if spray mists from spraying or vapour are apparent.

SWALLOWED: Drink water or milk. Do not induce vomiting.

INHALED: Remove to fresh air.

SKIN: Wash off with water followed by soap and water.

EYES: Wash off with copious quantities of water for 15 minutes.

Seek medical advice in all cases.

CLEAN UP

Clean up or washing down is done with water. Neutralise after this action with NEUTRA. Dispose of the neutralised run-off as required with environmental protection legislation.

STORAGE

Store MARVELCLENE in a cool area, under cover and away from other chemicals or foodstuffs.

PACK SIZES

MARVELCLENE is sold in packs of 15L

TRANSPORT

UN No. 1805, CLASS 8, SUBCLASS NONE, HAZCHEM 2R, PACKAGING GROUP III, IERG. No. 37.
