

# GLEAMCLENE

## DESCRIPTION

**GLEAMCLENE** is designed to clean iron and steel without attacking the metal. Additionally, **GLEAMCLENE** cleans rust and calcium stains off toilet bowls and glass.

## DIRECTIONS

### IRON AND CALCIUM STAINS:

Remove with **GLEAMCLENE** diluted between 2 to 5 times. Work up a dry wall.

### METAL:

Only soak steel objects in **GLEAMCLENE** as supplied or diluted with water up to 3 times. Do not soak aluminium, copper, or other amphoteric metals. The amount of dilution depends on the degree of rust to be removed and its age.

### GLASS:

Apply dilutions between 5 to 9 times with water soaked on a rag. Wipe over the window face to remove stains from reticulation or material build up. Wash down with water. Stubborn stains can be removed with undiluted **GLEAMCLENE** by spotting the stain and rubbing it with a rag.

### TOILET BOWLS:

Pour 100-200ml of **GLEAMCLENE** into the water in the bowl. Brush the **GLEAMCLENE** over the bowl and leave for 1-2 hours for light staining. For heavy staining, brush **GLEAMCLENE** around the bowl 3 or 4 times at 2-hour intervals and leave overnight. Rinse after treatment with two flushes. Add from 100-200 grams of sodium bicarbonate or sodium carbonate to bowl water and flush the toilet.

## SAFETY

Wear safety glasses, rubber gloves, safety boots and protective clothing.

## FIRST AID

**SWALLOWED:** Drink water or milk. Do not induce vomiting.

**INHALED:** Remove to fresh air.

**SKIN:** Wash off with water followed by soap and water.

**EYES:** Wash off with copious quantities of water for 15 minutes.

Seek medical advice in all cases.

## CLEANING

Cleaning or washing down is done with water. Treated sites should be neutralised after washing with **NEUTRA** diluted 9 times with water and then rinsed again with water. 1 litre of **NEUTRA** makes 10 litres of an appropriate dilution.

## STORAGE

Store **GLEAMCLENE** in a cool area, under cover and away from other chemicals or foodstuffs.

## PACK SIZES

**GLEAMCLENE** is sold in packs of 5, 10, and 20 litres.

## TRANSPORT

UN No. 1760: CLASS 8: SUBCLASS NONE:  
HAZCHEM 2R: PACKAGING GROUP II + III: IERG  
No. 37.

Before using **GLEAMCLENE**, either diluted or undiluted, always do a small trial on the stain to be removed so the least amount of acid is used.
