

GRAFFI PEN REMOVER

DESCRIPTION

GRAFFI PEN & CRAYON REMOVER is a clear thin liquid solution which removes marker pen, felt pen and wax crayon graffiti. The product does not contain any types of ACIDS or ALKALIES.

FEATURES

- Safe solvent system for removal of mentioned stains.
- Does not contain acids or alkalies(caustic).
- No deposits or residue after use.
- Can be used on many types of surfaces.
- Very low odour.

DIRECTIONS

Work with a small amount of remover at a time, separate from main container. This prevents contaminating the bulk of the remover. Always perform a test section to determine whether **GRAFFI PEN REMOVER** is suitable for use on the surface being cleaned.

- Damp a section of a rag or use a nylon brush well wetted with the remover and apply to the graffiti.
- Rub the rag or brush on the graffiti and while the surface is wet, and the stain loosened, wipe off with a clean rag.
- Always use a clean section of the wiping or applying rag. When they are fully stained with removed graffiti, dispose of them. Allow the rags to dry out completely before placing them in a disposal container.
- Wax Crayon markings take longer to remove than felt pen markings. More rubbing and wiping of the rag or brush with extra product will be required for complete removal.

- Do not use coloured or contaminated product. Dispose of it into old disused rag(s) and decant fresh product into the working container. Allow the solvents in the old rag to evaporate completely before bin disposal.
- Removal of spray can paint will take extra rubbing and agitation. It is done in small sections at a time, so delicate furnishings do not become damaged.
- In most cases of marker pen, crayon and spray can paint removal, use of a well wetted rag with remover using a sponging rubbing action will remove the stains.
- Finish any removal using a water dampened rag and sponging it over the worked area where the stain is.

CAUTION

ALWAYS TEST A SURFACE BEFOREHAND WITH **GRAFFI MARKER & PEN CRAYON REMOVER** TO OBSERVE ANY DAMAGE TO A SURFACE. IF THERE IS, DO NOT USE IT.

Always store Graffi Marker Pen & Crayon Remover in a cool covered area between 5-30°C. Store away from flammable heat sources and food.

FIRST AID

SWALLOWED: Immediately rinse mouth with water. Do not induce vomiting. If vomiting occurs give further water. Seek immediate medical advice.

EYE: Immediately irrigate with copious amounts of water for at least 15 minutes. Hold eyelids open while rinsing. Wash skin area and transport patient to hospital or a medical centre.

GRAFFI PEN REMOVER

SKIN: Immediately wash contaminated skin area with plenty of water. Remove contaminated clothing and wash if being reused. If redness, blistering or irritation occurs, seek medical advice.

INHALED: Remove patient from contaminated area. Loosen clothing. Keep patient warm and relaxed until full recovery. If breathing laboured and patient is experiencing cyanosis, ensure airways are clear and have a trained person give oxygen through a face mask. If breathing stopped, apply artificial respiration. If cardiac arrest occurs apply external cardiac massage. Seek medical advice if symptoms persevere.

CLEAN UP

Wash down with water. Restrict any product flowing down drains or into rivers. Absorb any wet residue with absorbents such as attapulgate or vermiculite. Dispose in a recognised waste site.

SAFETY

Wear nitrile gloves, protective clothing, safety boots, goggles and an organic cartridge breathing mask if using enclosed. Have breeze flowing over the wash area if possible.

PACK SIZES

GRAFFI MARKER PEN & CRAYON REMOVER is sold in packs of 1, 5 and 20 litres.
