

NEUTRA C

DESCRIPTION

NEUTRA C is a clear alkaline solution (pH 10) which has similar chemical properties to ammonia but does not have the pungent odour. **NEUTRA C** is used to neutralize mineral or organic acid residues remaining in brickwork. The action of **NEUTRA C** eliminates the acid fumes which slowly come out of brickwork and attack internal metal fixtures or leave a white, powdery layer over objects inside a house or building.

PRECAUTIONS

Mask off any metal surfaces, painted or plain, electrical fittings, woodwork, (painted or plain) and any painted surfaces.

APPLICATION

USE **NEUTRA C** diluted 1-9 with water. Using a pressure garden spray applicator OR BRUSH. Gently APPLY **NEUTRA C** solution evenly over the brick wall so it is well wetted but not running down the wall. Coverage rate as a guide is 0.5-1.0 litre/m². This range of rates depend on the porosity of the bricks and mortar in the wall. TWO COATS MAYBE NECESSARY. Let the applied **NEUTRA C** solution sit on the brickwork for approximately 5-10 minutes before washing down with a low-pressure water wash (generally light pressure blast or hose) this action washes the **NEUTRA C** into the brickwork more effectively. The treated wall, when dry should be tested with litmus paper to determine its finally pH. It should be in the region of 7-9. The resultant wall can be plastered or painted in the future if desired.

STORAGE

NEUTRA C as supplied can be stored in metal or plastic containers. Store undercover, in a cool environment, away from foodstuffs.

HANDLING AND SAFETY

NEUTRA C is alkaline and can cause injury to eyes and irritation to the skin. Operatives should wear protective clothing, impervious gloves and goggles. Vapour toxicity of **NEUTRA C** presents no hazard at ordinary temperatures. Do not heat **NEUTRA C** for use.

FIRST AID

SWALLOWED: Give water or milk to drink in large quantities as soon as possible. Encourage vomiting.

EYES: Wash eyes for 15 minutes with copious amounts of water.

SKIN: Wash with copious amounts of soap and water.

PACK SIZES

NEUTRA C is sold in packs of 1, 5 and 20 litres.

TRANSPORT

NEUTRA C is classified as a hazardous good for transport by Safe Work Australia.
